### Vintage

The beginning of the 2017-2018 winter was relatively mild with temperatures around 0/-1°C at the beginning of January. Spring too was full of surprises, with early bud-break (mid-April), the vines started to grow, helped by warm damp weather. As in 2017, summer brought with it a real heatwave but summer rain allowed the grape to develop normally, giving us some clues about a promising harvest in terms of quality and quantity.
